Extensions (sélection)

Quelques démonstrations...

Bookcreator

Utiliser l'interface via l'icône “ajouter au livre” à droite....

Bootstrap Wrapper

- Bootstrap Wrapper
  - extension nécessitant un thème Bootstrap, tel que bootstrap3
  - Pour les icônes, installer aussi l'extension icons

Bureaucracy, pagemod, struct

- bureaucracy
- pagemod
- Exemple :
  - mailing_form-test
  - mailing_result
- struct (inspiré de data
  - nécessite sqlite

catlist

- Ressources en enseignement de la chimie

chem

- heptahydrate du sulfate de fer (II) : $FeSO_4 \bullet 7H_2O$ (écrit FeSO4•7H2O sans indices)

csv

- liste non exhaustive de produits chimiques autorisés, interdits ou autorisés sous conditions dans les établissements scolaires de l'enseignement secondaire général

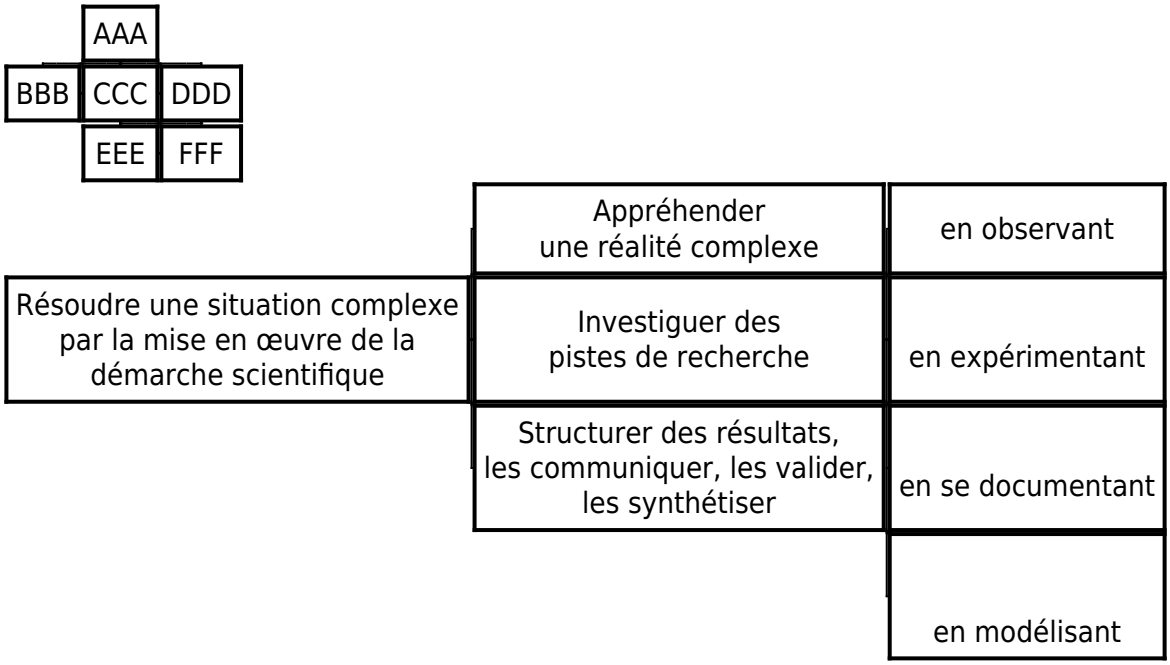
dataplot

exemple

Definition list

- Glossaire de chimie

diagram



Autres exemples :

- curriculum_chimie_secondaire
- demarche-investigation

Doodle4

- test_doodle4
- Pour des votes : vote-451217

  - Sylvie Colaire

OpenLayers map

- exemple

plaintext

- https://www.dokuwiki.org/plugin:plaintext

<text>

Similar to **<nowiki>text</nowiki>**, but linebreaks are preserved (replaced by
 in the output, but head and tail linebreaks are trimmmed)

```
<text>
(Line 1) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.
(Line 2) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.

(Line 4) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.
</text>
```

<TEXT>

Adds a box like **<code>**, but long text is auto wrapped.

```
<TEXT>
(Line 1) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.
(Line 2) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.

(Line 4) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.
</TEXT>
```

<code> <file>

This plugin adds a “plaintext” style for wrapped text, so you can use it in **<code>** or **<file>** box.

```
<file plaintext>
(Line 1) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.
(Line 2) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.

(Line 4) This is a **long** //long// __long__ long long long long long long
long long long long long long long long long long long long sentence.
</file>
```

WikipediaSnippet

Snippet de Wikipédia: ***Wiki***

> Un **wiki** est une application web qui permet la création, la modification et l'illustration collaboratives de pages à l'intérieur d'un site web. Il utilise un langage de balisage et son contenu est modifiable au moyen d'un navigateur web. C'est un logiciel de gestion de contenu, dont la structure implicite est minimale, tandis que la structure explicite se met en place progressivement en fonction des besoins des usagers.
>
> Le premier wiki, créé en 1995 par Ward Cunningham pour réaliser la section d'un site sur la programmation informatique, fut appelé *WikiWikiWeb*. En 2021, selon Alexa Internet, le site géré par wiki le plus consulté est Wikipédia.

Creative Commons Attribution-Share Alike 4.0

Snippet de Wikipédia: ***DokuWiki***

> **DokuWiki** is an open source wiki application licensed under GPLv2 and written in the PHP programming language. It works on plain text files and thus does not need a database. Its syntax is similar to the one used by MediaWiki. It is often recommended as a more lightweight, easier to customize alternative to MediaWiki. The 'Doku' in DokuWiki is short for

> *Dokumentation* which in German means documentation.
>
> Because DokuWiki does not require a database, it can be installed on local PCs, flash drives, and folders synced with file hosting services or file synchronization programs such as Dropbox or Syncthing.

wrap

page exemple

Snippet de Wikipédia: ***Eggs as food***

> Humans and their hominid relatives have consumed eggs for millions of years. The most widely consumed eggs are those of fowl, especially chickens. People in Southeast Asia began harvesting chicken eggs for food by 1500 BCE. Eggs of other birds, such as ducks and ostriches, are eaten regularly but much less commonly than those of chickens. People may also eat the eggs of reptiles, amphibians, and fish. Fish eggs consumed as food are known as roe or caviar.
>
> Hens and other egg-laying creatures are raised throughout the world, and mass production of chicken eggs is a global industry. In 2009, an estimated 62.1 million metric tons of eggs were produced worldwide from a total laying flock of approximately 6.4 billion hens. There are issues of regional variation in demand and expectation, as well as current debates concerning methods of mass production. In 2012, the European Union banned battery husbandry of chickens.
